REPORT OF TRUSTEES.

LUNATIC ASYLUM,

NEAR MILLEDGEVILLE, GA., October 1st, 1882.

To His Excellency, ALFRED H. COLQUITT,

Governor of Georgia:

SIR:—The Trustees of the State Lunatic Asylum, submit herewith, the Annual Report of the Superintendent and Resident Physician of the Institution, for the twelve months from October 1st, 1881, to this date, which, with the accompanying Reports of the subordinate officers, give full and particular information of its operations for the year.

While the expense, per capita, is slightly more for each patient, than for the last few years, the increase of the expenses, is less than the Trustees had anticipated, since wages, food, clothes, and all other items of consumption, have increased during the year in a much greater ratio.

The Trustees take pleasure in reporting a decided change and improvement in the management, and administration of the affairs of the Asylum, particularly in the attention given to the mental and moral treatment of the Patients, besides decided improvements to the property of the Institution—there have been greater advances in these, than in any one year since their connection with it, and the Superintendent confidently expects to make greater improvements, in the same direction, during the next year.

There are now in the institution, 979 Patients, fully 100, if not 179, more than should be therein, to insure them proper care and treatment. The Superintendent estimates, that for the year 1883, there will be an average of 1,200 patients in the Asylum, and for 1884, when all the projected new buildings will be completed and oc-

cupied, 1,400 patients; for these, the Trustees ask an appropriation for 1883, of \$160,000.00; and for 1884, of \$190,000.00; being at the rate of 35 cents per patient, each day, and including the payment of all expenses of every kind, viz.: Salaries of officers, employees, clothing, wages, subsistence, fuel and transportation, ordinary and extraordinary repairs, and improvements of all the buildings, and other property of the State, medical supplies, and various contingencies, which cannot be foreseen or specifically estimated for—but no provision is included therein for insuring the property, which matter is again brought to the attention of your Excellency and the Legislature.

It will be seen from the report of the Superintendent and Steward, that we carry forward a considerable unexpended balance from the appropriation of last year. The reason that this amount is carried forward is this: There are large improvements and repairs, necessary, to the present buildings and grounds, to preserve the health of the patients, and preserve the large property of the State, but as all expenses of labor and materials continued to increase, the Trustees feared the appropriations might not be sufficient for the expenses of the year, and these very necessary improvements and repairs, were postponed until the end of the year, when it would be positively known whether the money would be in hand to do this work. As it has been found that we have gone through the year, and have laid up money enough to pay for the improvements and repairs, they have been entered upon. It will require the whole unexpended balance to pay the cost of same.

NEW BUILDINGS.

As stated in the Report for last year, a few days after the Act of the Legislature was passed, making appropriations for the new buildings, the Trustees convened at the Asylum, and advertised for material, and about a month after, on October 11th, 1881, made a contract for a large part of the brick. The contractors soon went to work, but as was anticipated, the season was so far advanced, and so very unpropitious for making brick, that but little was done until the opening of the Spring of this year; meanwhile, contracts had been made for all

the other materials, and erecting the principal building, containing about 500 rooms, for the use of the colored patients.

Considering the difficulty of procuring mechanics and laborers, owing to the unusual amount of work going on in all parts of the State, and the continued difficulty of making brick, and hauling them, and other material, on account of the quantity of rain during the Spring and Summer, the work has not gone forward as fast as was anticipated; still this large building is well advanced, and it is expected that a number of the rooms, will be occupied by March, and the whole building of 500 rooms, completed and occupied during the next Spring. This building is plain in its plan and construction, without ornamentation, still a sightly structure, well suited for the purpose for which it is intended, and the work substantially done. When this building is completed and ready for the reception of patients, the buildings now occupied by colored patients will make room for two hundred and twenty white patients, thus affording provision for the stress now upon the Asylum, as it is not able to receive over two hundred applicants now pressing for admission to its wards.

It will be seen by reference to the Report of the Superintendent and that of the Architect, appended thereto, that a further appropriation of \$74,254.82 will be required to complete in all respects, the new buildings authorized by the Act of September, 1881, including heating, gas and water, through the interior; in addition to this, the sum of \$15,000.00 will be required to furnish all these buildings, which is less than \$19.00 for each of the 850 rooms in all, making together, \$89,254.82.

The Trustees fully unite in their opinions, and the reasons given in the Report of the Superintendent and Architect, for asking this increased appropriation. Indeed, they think the estimate, particularly for the furniture, is too small, but as it is made by one of great experience, and fully reliable, they yield to his better judgment, and adopt his recommendations. The increased appropriation asked for, is a necessity to enable the Trustees to complete the buildings, and render them fit for occupation.

The Trustees append hereto a tabular statement, showing at one view, all the various appropriations asked for in this report, for the years 1883 and 1884.

Respectfully submitted,

L. N. WHITTLE, President.

T. F. NEWELL,

S. P. MYRICK,

W. H. HALL, M. D.,

G. A. CABANISS.

TABULAR STATEMENT

*Of Appropriations needed for the State Lunatic Asylum
of Georgia, for the years 1883 and 1884:*

For Subsistence and Salaries for 1883,.....	\$160,000.00
For Subsistence and Salaries for 1884,.....	\$190,000.00
	<u>\$350,000.00</u>

FOR FINISHING NEW BUILDINGS, FURNITURE, ETC.

For Completing large Brick Building for: Colored Patients,.....	\$30,416.00
For Completing two Convalescent Buildings,	29,085.00
For Completing Hospital Building,.....	1,556.00
For Completing Amusement Hall,.....	1,882.00
	<u>62,939.00</u>

For Completing Water Closets, Bath Tubs, Water and Gas Pipes for new Colored Building,.....	2,973.30
Same in Convalescent Building,.....	3,773.00
Extension, Enlarging and Renewing Gas Works,.....	4,569.52
	<u>11,315.82</u>

For Furniture for all the New Buildings,.....	15,000.00
	<u>\$439,254.82</u>

SUPERINTENDENT'S REPORT.

STATE LUNATIC ASYLUM,
NEAR MILLEDGEVILLE, GA., 1st October, 1882.

To the Honorable Board of Trustees

Georgia Lunatic Asylum :

GENTLEMEN:—It again becomes my duty under the law and rules of the Institution, to present to you for your consideration, the annual report of this Institution, together with those of the Steward, Treasurer, and other officers, giving a detailed account of its management, and movement of its population, &c., since October 1st, 1881, to the 30th of September, 1882, inclusive, which I herewith respectfully submit.

On the 1st of October, 1881, there were nine hundred and six patients in the Institution. We have received during the year, two hundred and fifty-seven. There have been discharged, removed, and died, one hundred and eighty-four, leaving on hand the 1st of October, 1882, nine hundred and seventy-nine. The average number under treatment during the year, was nine hundred and forty-two. While the whole number that have been treated or cared for, were eleven hundred and sixty-three.

Statement in Relation to the Number of Patients during the past Twelve Months, or from 1st October, 1881, to the 30th September, 1882, inclusive.

There remained on hand, 1st of October, 1881,....906.

Of the deaths, there occurred, twenty-one (21) from general chronic exhaustion, seventeen (17) from epilepsy, eight (8) from old age, eight (8) from paralysis, four (4) from diarrhoea, five (5) from consumption, two (2) from dysentery, two (2) from apoplexy, one (1) from general debility, six (6) from marasmus, one (1) from heart disease, one (1) from effusion of heart and lungs, one (1) acute congestion of the lungs, one (1) pneumonia, one (1) congestion of the bowels, one (1) carbuncles.

From the above it will be seen that of the deaths which occurred, only a few were curable cases.

It will be observed that we have received during the year, one hundred and forty-four (144) chronic, and one hundred and thirteen (113) acute cases, or those not insane longer than twelve months before admission, according to the history of cases furnished at the time of reception. Our discharges will show a good per cent of recoveries in the acute and curable cases.

It will also be observed, that we have received during the year, fifty-nine (59) in very feeble anæmic condition from chronic and acute disease, some so feeble they could not walk without assistance, and some almost exhausted by the trip to the Institution, helpless and hopeless cases of paralysis and senile imbecility with all the indications of mental and physical decay; nothing to justify a hope that they could live but a short while. Often the friends do not appear to appreciate their true condition; they are brought to the Asylum as the last resort (what a fearful responsibility), their friends still entertaining hopes of mental and physical recovery, some of them living only a few days, or weeks, after reception.

It will be seen from the receptions this year, that we have but a few cases that we can hope for complete recovery the ensuing year. During the past year we have treated a larger number, than any previous year, and at the close of this year we have remaining in the Institution an excess over last year of seventy-three (73) patients; we have been constantly taxed to know how we could provide room for them in our crowded condition, being under the necessity of putting two or more in a room, when we were not fully satisfied that they would not commit acts of violence towards each other; we, therefore, feel truly grateful to a merciful Providence for exemption from any serious accident.

The general health of the institution has not been as good as last year. We have had some malarial fever with our patients and attendants, mostly confined to attendants. No case however, resulted fatally; being so fearfully crowded in every department, I was apprehensive that it might continue to an alarming extent. Great credit is due my assistant physicians for the efficient and faithful manner in which they cared for each and every case.

Four or five months of this year, our doors were closed against visitors, on account of the prevalence of small pox throughout the country. Just as soon as we were fully satisfied there was no danger, our doors were again opened as formerly to visitors.

By reference to tabular statements, 1, 2, 3 and 4, will be seen the statistical information regarding the duration, occupation, age and civil condition of those received during the year.

EMPLOYMENT.

The employment of patients, indoors and out, continues in a very satisfactory manner, considering the means at our command. When we speak of employment, we mean all those means that give occupation to the patient—labor, exercise, amusement, riding, &c.—anything that interests, or gets the attention of the patient. Our main object is to get that diversion, which is so necessary to their contentment and recovery. In an institution where all classes of the insane are received, it requires discreet judgment, in classifying the patients, and giving them such employment as is best suited to their taste, habits, mental and physical condition, and there should be careful observation as to its effect, as a remedial agent. Too much caution cannot be exercised as to work with very acute cases; they generally need profound rest. The first indication of mental improvement should be promptly observed, and all possible means

used for strengthening and developing the mental powers. My observation of the insane for the past twenty years, has led me to the firm conviction, to make the treatment remedial, the constitutional and acquired differences of the habits, taste, &c., of the patients should be properly considered, and their surroundings and employment should be made with a due regard to it; the same routine treatment cannot be relied upon for all classes. If these differences in the habits, taste and peculiarities of the patients are lost sight of, we are apt to drift into a routine treatment, from which we cannot accomplish the good desired. It is gratifying to know when our detached buildings, which are now in progress of completion are ready for the reception of patients, our moral and sanitary treatment will be greatly advanced by diversifying the surroundings and changing the influences, which are so useful with a certain class of patients. I do not think that proper and judicious employment can be overestimated. I have frequently observed decided indications of mental and physical improvement, from a few weeks of regular employment, especially when there is a manifest interest in the work. Our patients are not forced to work, but they are encouraged to do so. The Attendants whose duty it is to take them out, join in the work with interest and cheerfulness, and the patients are encouraged to follow the example of the Attendants. Their labor is now utilized, to some extent, in almost every department of the Institution, and some of them have become so interested in the employment given them, they engage in it regularly from day to day. Many of them appreciate the fact that it improves their health and promotes contentment. There cannot be any doubt whatever, under proper management, as to its ameliorating and curative influences. We could refer to many cases, in which their improvement and recovery was principally due to those means. I regard employ-

ment as one of the most essential features in the treatment of the insane. This institution, of course, will continue to be the permanent home of a large number of patients—their condition makes it necessary that they should have some kind of custodial care. The health, happiness and contentment of this class of patients depends greatly upon some suitable employment. If they were left to mope and grope about the wards, they would soon get into bad habits and become indifferent to their surroundings, and gradually drift into dementia, become careless and perhaps filthy. Our farm, and garden, yards, &c., afford healthful occupation to many of the male patients; and the laundry, sewing rooms, and other employments about the wards, for female patients. We have extended as much liberty to our patients as was compatible with their condition.

AMUSEMENTS.

Dr. Whitaker, with the assistance of Dr. Hall, has with commendable zeal and interest, continued the amusements through the year as formerly, doing all they could to interest the patients and promote contentment and happiness, by breaking the monotony of Asylum life, and building up the weakened mental powers, by varied diversions. One evening in every week, is generally given to diversion of some kind. We had our May day celebration as usual, out in the grove near the Institution—a large number our patients participating in the amusements of the day. Our flower garden has afforded an abundant supply of flowers for the patients, and for decorating the wards. All of those whose condition will justify it, have the privilege of the flower garden every evening, when the weather is suitable, and they usually spend from one to two hours in walking through the garden, gathering flowers, and sometimes engaging in games of amusement in the open air.

IMPROVEMENTS FROM 1ST OCT., 1881, TO 30TH SEPT., 1882.

- New floors to old building, 7th, 8th and 9th wards.
- Stairways and lattice partitions to male porticoes.
- Inside blinds to all the windows in the centre building.
- Two neat stairways to side entrances male and female buildings.
- Door and stairways to female basement.
- One frame shelter in the female recreation yard.
- Stairway from assistant steward's office to basement store-room.
- One two-room house pulled down and rebuilt.
- One four-room house pulled down, moved and rebuilt.
- Two neat three-room cottages built.
- Two neat two-room cottages built.
- Five wells dug and finished.
- One neat prescription stand for the Apothecary.
- Rebuilt 333 feet of plank fence 9 feet high to male recreation yard.
- Three hundred feet of 4 foot picket fence.
- Stairway from kitchen to bakery.
- Stairway from kitchen to basement.
- One large brick oven.
- One 50 gallon steam coffee kettle.
- Completed steam bakery with one cracker and biscuit machine; one dough-mixer; one dough-kneader.
- One line shafting, pulleys and belting, driven from the Fan Engine.
- Two iron pipes, guards to hot air furnaces.
- Six wooden guards to hot air furnaces, male and female colored department.
- Thermometers, male and female departments.
- Iron pipe stair-way guards to area steps.
- Wood and wire guard to area.
- One water closet and slop sink to 3d floor centre building.
- Two new cones to female department.

Two hundred feet wire cloth made into wire window guards.

A number of lattice doors to patients' rooms.

In connection with steamboilers, there is a safety steam recording guage, that tells the time steam is generated and the amount of pressure carried during the time steam is required.

An Hydraulic safety valve, on the discharge pipe from Fire Engine, prevents any excess of pressure on the fire plugs.

A large number of tables and benches have been made during the year for the different departments.

Many daily improvements and repairs have been made, which are too numerous to mention—the grading and sodding, continues to go on in the yards. A good deal of painting in the different departments.

EXTENSION OUTSIDE FIRE PROTECTION.

620 feet 3 and 4 inch cast iron pipe.

Four 2½ Double outlet Chapman fire plugs. .

Relaid 600 feet 3 and 4 inch cast iron pipe.

300 feet 1½ inch galvanized iron hot water pipe.

175 feet gas pipe to Steam Bakery.

50 feet gas pipe to Apothecary.

Number gas pendants made, and pipes repaired throughout the Institution.

Valves and bibbs renewed which would require a long itemized statement.

63 feet 6 inch cast iron pipe.

20 feet 4 inch cast iron pipe.

Two 6 inch Chapman valves.

One 6 inch Foot valve connecting with new reservoir.

One underground reservoir, capacity 127,000 gallons.

Earth removed from this reservoir was used in leveling the yard.

Railroad from kitchen to female buildings.

One brick building, 14 feet by 14 feet, for fire hose and oil.

FIRE PROTECTION.

While your Honorable Board are familiar with our arrangements for guarding against and extinguishing fires, the public generally are not. Hence it might be proper for me, under the head of improvements, to give an account of our arrangement for protecting the Institution against fire.

Capt. Wilcox, the Engineer, has organized a Fire Brigade, composed of Attendants. They have a code of rules for the guidance of the brigade. All the male Attendants are subject to fire duty, alternating, each serving twenty-four hours.

Once, each week, the detachment on duty drills, with one section of hose. All the fire plugs are visited, the hose connected; and water thrown by gravity, which insures the proper working of each fire plug.

At each fire plug, the men change their post in the detachment, by this means, every man is made familiar with connecting the hose, and turning on the water.

200 feet of $2\frac{1}{2}$ inch leather hose is kept on a fixed hose reel, in a small brick building, located at a central point, easy of access.

On shelves in this same building, in rolls of 40 feet each, are five hundred feet more hose of same character. 50 feet of hose is kept hanging in the tower, and used for drill purposes.

In addition to the above, there are a number of rubber fire buckets, that are located at accessible points, and water can be drawn from any fire plug.

OUTSIDE FIRE PROTECTION

Consists of a 40,000 gallon water tank, on the top of a 64 feet brick tower. Duplex Worthington steam pump, that takes suction from three reservoirs of 207,000 gallons combined capacity; when all are full, discharging

through 3,000 feet of 3 and 4 inch cast iron pipe, to which are connected 21 $2\frac{1}{2}$ inch Chapman fire plugs.

This line of piping and its connection are so arranged that water can be thrown by gravity to a height of 40 to 60 feet, owing to location, either on or below the level of tower base.

The gravity pressure would be used in the event of no steam. So soon as steam reaches a pressure of 20 lbs. the gravity pressure is cut off, and direct pressure from the steam pump substituted, admitting two to four streams to be concentrated on any one point. All arrangements for controlling and changing direction of water, are operated from the outside.

INTERNAL FIRE PROTECTION

Consists of $1\frac{1}{2}$ inch pipes, connected to main supply pipe to wards, on which are valves for connecting linen hose. Each ward has 40 feet of hose in its clothes room. In addition there are rubber fire buckets, outside the front entrance of front building. At night, the water is cut off, and the watchman is instructed how to turn on water, if it is wanted. To insure a vigilant look-out, the outside watchman is supplied with a recording time piece. Keys are attached by chains, at important points, and on visiting them, the key is inserted into the time piece and turned; this operation pierces or indents a hole in a paper dial inside the case, which indicates the number of post, and the time it was visited. In the morning this paper dial is removed, read and reported, dated and filed away. A new paper dial is put on for next night. No record has shown neglect. A faithful night's work shows visits to all the posts, during each hour of the night. This clock gives an exact account as to how the night watch performs his duties during the night. This arrangement secures constant vigilance on the part of the night watch.

NEW BUILDINGS.

It will be remembered that the Asylum committee appointed by the legislature called upon the Board of Trustees for plans and estimates for the proposed increased accommodations for the insane of the State. Your Board promptly secured the services of Major Fuss, to make the necessary plans and estimates for the new buildings. He having only about a week to prepare them in, hence he had to make them very hurriedly, not having time to get the necessary data to make exact estimates. I think it more than probable, however, but for the unexpected advance in everything pertaining to the erection of the new buildings, that they might have been completed for the estimates made at that time, as it is thought all building material, labor, &c., have increased from fifteen to twenty per cent., since the estimates were made. By reference to the report of the Superintendent and Architect, it will be seen, that after a careful consideration of the plans, by your Board, and others, it was found necessary for the comfort, efficient, easy and economical administration of these different departments, to make some changes in first plans, which increased the cost some, as shown by the report of the Superintendent and Architect. It will also be seen by his report what appropriations are necessary to complete the building. You are aware, that there was no mature or decided plan as to heating. Though we had thought of a plan or system of heating, but upon careful investigation and observation, it was not thought to be safe, or satisfactory in other particulars. Hence the idea of that plan was abandoned, while it was cheaper in the first outlay, it would prove ultimately much more expensive, as it would require annual repairs to keep it in order.

From a thorough investigation, and the experience of those familiar with the system of heating we have adopted, it is the safest, most economical and satisfactory plan

of heating. The report of the Superintendent and Architect will give you the estimated amounts required for the completion of the new buildings; also, for heating, water closets, sinks, cones, pipes, &c. You are aware, there was no appropriation made for lighting the buildings, nor for water closet fixtures, bath tubs, pipes, &c.

The work on new building for colored patients is being prosecuted as rapidly as is thought to be safe to secure a good and substantial job. The brick contractors have had a great deal of trouble and many difficulties, to contend with during the year, by excessive rains and unusual high waters.

In view of economy and making the convalescent buildings, in keeping or corresponding more fully with the architectural appearance of the other buildings, I deem it proper and advisable, to call your attention to the propriety of making the convalescent buildings three stories instead of two, even if the third story is not completed now. It would not cost any more to cover them, and there will be but little increase in the cost of the heating apparatus. It is simply a question of very little time as to the room being needed. Hence the economy of making the change.

By reference to the report of the Steward, will be seen the estimated amounts necessary or required for the maintenance of the Institution for the years 1883 and 1884. Also the amounts necessary for furnishing the new buildings, as there was no appropriation made for that purpose.

For the year 1883, our average number of patients will perhaps not exceed twelve hundred; for 1884, about fourteen hundred. You will readily perceive that the estimated amounts of the Steward for the support of the Institution for 1883 and 1884 is as little as we possibly can get along with under favorable circumstances.

FARM AND GARDEN.

By reference to the report of Farm and Garden, it will be seen that these departments are well managed, and that they have furnished remunerative returns, for all expenses incurred.

ACKNOWLEDGEMENTS.

To the Editors and Proprietors of the following Newspapers we are greatly indebted, and express our sincere thanks for sending to this Institution, regularly, and gratuitously their papers, and we do most earnestly solicit their continuance.

To Mr. C. G. Wilson, and Milledgeville Brass Band,
for musical entertainments.

Mr. P. J. Cline and other citizens of Milledgeville, for newspapers, periodicals, &c., contributed.

Mrs. James Mercer Green, of Macon, Ga., for books magazines, &c., sent the Asylum.

Mrs. W. W. Thompson, of Smithville, Ga., for bundles of newspapers repeatedly furnished us.

RELIGIOUS SERVICES.

Rev. J. M. Stoney has continued with that same zeal and fidelity as Chaplain of this Institution, having services, regularly Sunday evenings and Wednesday nights, save a short while in the summer when he was absent from home. During his absence his pulpit was kindly filled, by other ministers of Milledgeville, for which we express our grateful acknowledgements. He has also visited the sick when advisable, and buried the dead in the department of the whites. We have an attendant at the colored department who is a minister, and he has officiated in that capacity there. The attendance on the services has been large, and the deportment of patients good.

Mr. and Mrs. Orme continue to assist greatly in the services, by leading the singing. Good singing is a very important feature in the services of any institution of this kind.

CONCLUSION.

My grateful acknowledgements are due my officers, employees and attendants for the faithful manner in which they have discharged their duties, (with but few exceptions.)

To you, gentlemen of the Board of Trustees, I am again under renewed obligations for the universal kindness and consideration you have extended to me in an official and social capacity, and for the advice and assistance you have always been ready to give, when I was in doubt about anything, pertaining to the interest of the Institution. Expressing my thankfulness for our freedom from any great calamity,

I am, gentlemen, with great respect,

Your obedient servant,

T. O. POWELL,
Superintendent, &c.

APPENDIX.

QUESTIONS TO BE ANSWERED BY PARTIES ACCOMPANYING PATIENTS TO THE ASYLUM.

1. Name?
2. Age?
3. Nativity?
4. Religion?
5. Occupation?
6. Married or single? (If female, state whether she has ever borne children, their number, and the date of last birth.)
7. Natural disposition? Has the patient exhibited any eccentricity of mind, disposition or temper before the present attack?
8. When did the first symptoms of insanity appear and how were they manifested.
9. Number, duration, and character of previous attacks, if any? Was the patient ever suicidal, and in what manner, or had a homicidal propensity or a disposition to be violent, destructive, or filthy.
10. Is there any physical disease, or derangement?
11. Have any of the patients's relations been insane, if so, who of them?
12. What is the cause of this, or previous attacks?
13. Is the patient addicted to the use of tobacco or spirituous liquors, or opium? If so, to what extent?
14. Has the patient ever received any injury of the head?
15. Does the patient sleep and eat, satisfactorily?
16. Is the patient disposed to do mischief with fire?
17. What treatment, or confinement has been employed?
18. Give the name of the person, or parties, to be addressed, in his or her case?

CLOTHING.

Each patient should be provided with at least two full suits of clothing.

Knives and Jewelry should be left at home.

ARCHITECT'S REPORT.

GEORGIA STATE LUNATIC ASYLUM, October 1st, 1882.

DR. T. O. POWELL,

Superintendent Georgia State Lunatic Asylum.

SIR:—You are aware that the estimates for the new buildings to be erected at the Asylum, (made in June, 1881,) were very hurriedly prepared—only five or six days being allowed for devising plans and estimating their probable cost. This haste, you will remember, was caused by the great anxiety felt by yourself and the Board of Trustees to comply with a request of the Legislative Committee, who had fixed a day on which the subject would be taken up and considered. It was therefore impossible in so short time to procure the necessary data for a more careful and precise estimate, still it may be a question of doubt as to whether the estimates would not have been ample, but for the unexpected and unforeseen advance in the cost of labor and materials. It is probably fair to say that building materials have been enhanced from ten to fifteen per cent., and labor from twenty-five to forty per cent. since the estimates referred to were made—say that the average increase in value has been fifteen per cent.—that amount added to the original appropriations would, I think, be quite sufficient to complete the buildings, as at first designed. Again, when the appropriations were asked for, no plan for warming the buildings in cold weather had been matured. It was known that the method of warming the old buildings would probably be superseded by some improved system; this knowledge suggested the propriety and duty of finding the best system available for the purpose, and started enquiry and investigation, resulting in the selection of the plan now generally used in asylums and other public buildings at the North by steam, at low pressure, (5 to 10 pounds) which on account of its efficiency, safety, durability and economy in running, is believed to be the best method known to meet the necessities of Asylum buildings. The first cost of the apparatus is pretty high; the outlay, however, is probably more than compensated by safety from fire, and economy in operating after it is once established, and we feel confident that it will prove

the best means for warming the buildings that could be adopted. As no adequate appropriation for heating apparatus for any of the buildings has heretofore been asked for, there will be submitted in this report estimates of additional appropriations required for that and other objects.

I have to state that the progress of our buildings has fallen short of the hopes and expectations entertained when we started out. You will remember that before contracts for the work could be consummated last fall, the season for brick-making had passed, and you also know that this summer has been one most unfavorable for work of that kind; on that account the contractors have been subjected to very serious hindrance, delay and loss. And again, on account of the great amount of building being done throughout the State, it was impossible to procure an adequate force of labor for prosecuting the work with such vigor and energy as was so much desired and strenuously urged. As an evidence of the scarcity of labor at this time, the contractors have been compelled to draw all hands from the brick yard and hospital building to enable them to keep the masons going on the building for negro patients. Every effort is now being made to get the building for negro patients closed in before cold weather is upon us, and the main object for which every exertion will be made, will be to have a sufficient portion of the building completed as soon as possible, of sufficient capacity to accommodate the colored patients now in the asylum, and when that is accomplished, the pressure now bearing so hard will in a measure be lifted.

Work has been commenced on the hospital building, but for the reasons before stated it has been temporarily suspended. Most of the brick for this building are now on the ground, and it is hoped that in a few days the work there may be resumed.

As regards the convalescent halls, no work has been done there, except the delivery of 300,000 brick.

It is proper to state before giving the estimates of amounts required to complete the buildings, and for other purposes, that on account of the nature of the ground upon which the negro patients building is located, it was deemed advisable to add 28 more rooms than was at first

contemplated in the original plan. A portion of the building had to be extended over low grounds, where the space between the ground and level of main floor, afforded the opportunity of adding in a basement the 28 rooms named above.

In maturing plans for the convalescent halls it has been deemed essential to add center buildings, which were not contemplated in the original design; this with other changes most desirable will necessarily increase considerably the cost of these structures; but as these changes and additions increase very much the convenience and comfort of the buildings, and as all necessary details for such edifices could not be matured in the haste of making the first plans and estimates, and as time and reflection have suggested valuable improvements which it is believed to be wise to adopt, and as you have expressed a wish to have these buildings made three stories instead of two stories, an estimate will be given of the probable cost in either case.

It is proper to state that estimates were not embraced (in the estimates for the building) for gas or water supply. It is assumed that fifteen per cent. for the increased price of building materials and labor may be a fair estimate of the increased value of these items in the cost of our buildings.

The following statement of estimated amounts that will be required to complete the buildings and furnish the heating apparatus, is respectfully submitted, viz:

FOR NEW BUILDING FOR COLORED PATIENTS.

Fifteen per cent. on original appropriation -	\$10,524 00
For 28 rooms added at \$250 - - -	7,000 00
For sewerage and division wall - - -	3,327 00
For heating apparatus (extra) - - -	9,565 00
	\$30,416 00

FOR CONVALESCENT WARDS.

Fifteen per cent. on original appropriations -	\$10,179 00
Extra for heating apparatus - - -	6,706 00
For two story buildings - - - -	\$16,885 00
Add for a third story - - - -	12,200 00
Additional appropriation if made 3 stories -	\$29,085 00

FOR HOSPITAL BUILDING.

Fifteen per cent. on original appropriation	-	\$1,398	00
Extra for heating apparatus	- - -	158	00

\$1,556 00

FOR AMUSEMENT HALL.

Fifteen per cent. on original appropriation	-	\$	985	00
For heating apparatus	- - - -		897	00

\$1,882 00

From the above statements it will be seen that additional appropriations to the amount of \$50,739.00 will be required if the Convalescent Halls are made two stories only; but if they are built three stories, then the amount would reach \$62,939.

Very respectfully, your obedient servant,
J. FUSS, ARCHITECT.

Estimates for Water Closets, Bath Tubs, Water and Gas Pipes for New Buildings and for Extension, Enlarging and Renewing Gas Works.

ESTIMATE FOR NEW COLORED BUILDING.

Water Closets, Bath Tubs, Water and Gas Pipes.	- - - - -	\$2,973	30
--	-----------	---------	----

CONVALESCENT BUILDINGS.

Water Closets, Bath Tubs, Sinks, Water and Gas Pipes	- - - - -	3,773	00
--	-----------	-------	----

GAS WORKS EXTENSION.

One 12,000 Cubic Foot Holder	- - -	2,300	00
Retorts, House Tank	- - -	1,298	00
1,900 feet 3 and 4 inch pipe	- - -	815	00
Lead Joints, Excavating, etc.	- - -	156	52

\$11,315 82

STEWARD'S REPORT.

STATE LUNATIC ASYLUM,

NEAR MILLEDGEVILLE, GA., 1st October, 1882.

T. O. POWELL, M. D., SUPERINTENDENT, &c. ;

SIR—I have the honor through you, to transmit to the Honorable Board of Trustees of the Asylum, this my report as Steward, embracing the period, commencing the 1st of October, 1881, and ending the 30th of September, 1882, both days included.

Abstract A, shows the amount brought forward, from last year, the amount drawn from the State Treasury upon my requisition under the approval of the Superintendent, and the auditing by the Board of Trustees, the money collected by me from all miscellaneous sources, as shown in detail in Abstract B, together with a classified statement of the disbursement, and the amount carried forward to the 1st of October, 1882.

Abstract B, shows all money received by me this year from all miscellaneous sources, not consolidated, however, but in detail, and my payment of the same to the Asylum Treasurer, for which I hold his receipt.

Abstract C, shows the amount appropriated for enlarging the Lunatic Asylum and other purposes, under the Act of the Legislature, approved 8th of September, 1881. The amount drawn, the amount expended and the amount remaining in the Asylum Treasurer's hand on the 1st of October, 1882.

Abstract D, shows the amount of the special appropriations, expended for the new building for the colored insane, in detail.

Abstract E, shows the amount of same appropriation expended for hospital, in detail.

Abstract F, the amount expended for superintending construction in detail.

Abstract G, shows our account with the Treasury of the State on our general account for support and maintenance of the Asylum. It shows the amount that remained to the credit of the Asylum, 1st of October, 1881, the amount drawn by requisition since, and the amount of the appropriation for the Asylum year, ending 30th of September, 1882, remaining in the State Treasury to the credit of the Asylum undrawn 1st October, 1882.

Abstract H, stock, wagons, &c., on hand.

Our PER CAPITA PER DIEM for furnishing everything is 38 5-8 cents.

This per capita as compared to former years looks large, and needs explanation.

1st. It must be remembered, that nearly everything has advanced in price.

2nd. Extraordinary repairs shows an expenditure of \$4,595.41, for a new brick cistern, of 127,000 gallons capacity, built.

For four neat cottages built, and we have purchased a tract of land necessary to be owned by the Institution, costing \$2,000.

3rd. By reference to the Assistant Steward's report, and the Apothecary's, it will be seen they together, carry forward goods on hand paid for \$8,926.01. All of these three, must be taken into consideration. Deduct the extraordinary repairs, and what we have on hand paid for, amounting together to \$13,521.42 and you reduce the per capita at once. By reference to Abstract G. it will be seen that we have two months of the appropriation for the Asylum year ending 30th September, 1882, remaining in the Treasury, amounting to \$20,833.40.

All of which is respectfully submitted,

JOHN HAMMOND, Steward.

ABSTRACTS.

INVENTORY OF MACHINERY AND TOOLS.

INVENTORY, 1882, ENGINES AND PUMPS.

One Vertical Ventilating Engine.....	11x18 inches.
One Machine Shop Horizontal Engine.....	10 $\frac{1}{2}$ x20 "
One Fire Engine Duplex 'Worthington'.....	10x12 "
One Water Works Engine, "Cameron,".....	14x24 "
One Auxiliary Water Works Engine, "Hardick".....	10x12 "
One Boiler Feeder, "Cameron".....	3x6 "
One Boiler Feeder, "Knowles".....	4x6 "
Two Boiler Feeder, "Worthington".....	6x9 "
One Boiler Feeder, extra, "Worthington".....	6x9 "

BOILERS.

Two Fire Box Tubular.....	.40 H. P. each
Two "Lowe" Pat Tubular.....	.40 H. P. each
One Return Tubular.....	.35 H. P.
One Return Tubular.....	.30 H. P.
One Fire Box Flue, not in use.....	.26 H. P.

IRON AND WOOD WORKING TOOLS.

- One Screw Cutting Engine Lathe Swing..... 24 inch turn 7 feet 6 inches.
- One Screw Cutting Engine Lathe Swing..... 9 inch turn 5 feet 6 inches.
- With complete outfit of gearing, rests, chucks and turning tools.
- One Power Pipe Machine with right and left dies and taps for cutting pipe threads from 3-8 to 2 inches.

Two pair pipe stocks.	2 Belt punches.
Two cut off tools.	10 pounds chipping and calking chisels.
Eight Monkey Wrenches.	1 Gas fitter's vise.
One Lathe Brush.	21 Pair gas tongs.
Thirteen twist drills.	1 Pair gas pliers.
Nine bolt drivers.	12 Assorted taps.
Nine Lathe dogs.	3 Rimmers.
6 Oil cans.	13 pounds tap wrenches.
2 Oil Stones.	1 Grind stone, 20 inches diameter, 6 inches face.
2 Hand screw plates.	1 Grind stone, 10 inches diameter 2 inches face.
1 Hand Vise.	Tool closets, 5 ; Tool Racks, 3.
2 Bench Vises.	
4 Pair pliers wire cutting.	
1 Pair pliers belt.	

BLACKSMITH SHOP.

1 Anvil, 175 pounds.	Assorted tools, 88 pounds.
1 Bellows.	Hammer, 1.
1 Bellows, old.	Sledge, 1.
225 Swage blocks.	Wrench, 1.
83 pounds tongs.	Horse shoeing tools, 1 box.
Heading tools, 38 pounds.	

CARPENTER'S TOOLS.

Firmer chisels, 24.	Bevels, 1.
Framing chisels, 24.	Thumb gauge, 1.
Framing chisels, 3. (old.)	Augers, 5.
Paring chisels, 4.	Boring Machine, 1.
Paring Gauges, 3.	Boring Machine Augers, 4.
Auger Bits, 25.	Auger Handles, 2.
Iron Stock Planes, 6.	Rimmers, 3.
Wood Stock Planes, 5.	Hollow Augers, 2.
Match Planes, 1-4 inch, 2.	Centre bits for brace, 19.
Match Planes, 3-4 inch, 2.	Drill bits for brace, 6.
Hand Saws, 8.	Drawing knives, 2.
Framing Saws, 1.	Saw Sets, 1.
Twist drill bits, 8.	Try Squares, 2.
Counter sinks, 3.	Framing Squares, 1.
Brace Screw Drivers, 2.	Iron Hand Clamp, 4.
Hand screw drivers, 2.	Dividers, 1.
Iron Braces, 2.	Door Clamps, 2.
Oil stones, 2.	Hand Mitre Machine, 1.
Extension bits, 2.	Spike maul, 1.
Hand axe, 2.	30 foot tape line, 1.
Hatchets, 2.	Tool chest, iron bound, 1.
Hammers, 2.	Bench vises, 2.

WOOD WORKING MACHINERY.

Pony Planing Machine.	1 Tennoning machine.
3 sets bits for same.	2 cutter heads.
2 Cutter Heads.	1 cope cutter head.
1 cast iron wrench.	4 cope bits.
Pony Matching Machine.	6 cutter head bits.
4 cutter heads.	1 Emory grinding machine.
1 set of 12 bits.	4 Emory wheels.
2 cast iron wrenches.	1 Universal saw table.
1 Foot mortising machine.	3 Universal saws, guides.
4 new bits.	6 saws.
4 old bits.	1 scroll saw.
1 cast iron wrench.	13 scroll saw blades.
1 Sticking machine.	1 cast iron wrench.
3 cutter heads.	1 picket cutting machine.
35 pairs bits.	6 wood turning chisels.
2 cast iron wrenches.	

MASON'S TOOLS.

1 sand screen.	1 wheel barrow.
1 trowel.	1 iron wheel barrow.
1 pointing trowel.	2 axes.
1 shovel.	2 shovels at boiler rooms.
1 hoe.	2 axes at boiler rooms.
1 shovel at Gas House.	2 Fire Department axes.

LAUNDRY MACHINES.

3 Standard laundry machines.	1 centrifugal wringer.
1 Standard laundry machine, (old.)	1 starch boiler.
1 steam mangle.	
6 brass mounted lanterns.	1 cracker machine.
1 iron mounted lantern, reflecting.	1 dough mixer.
1 threshing machine.	1 dough brake.
1 grain fan.	

REPORT ASSISTANT STEWARD.

MR. JOHN HAMMOND, Steward,

Enclosed you will find consolidated statements of issues from Assistant Steward's office from October 1st, 1881, to October 1st, 1882. I have \$6,759.19 worth of goods on hand paid for, October 1st, 1882. The pork, 4,161 gallons of milk, and 2,795 eggs were furnished from yards of the Institution.

Respectfully yours, J. A. ORME, Ass't Steward.

Surgical instruments and prescription blanks on hand.....	504 42
	\$2,166 82

All of which is most respectfully submitted.

P. A. WEST, Apothecary S. L. A.

CHAPLAIN'S REPORT.

DR. T. O. POWELL,

Superintendent, etc., Georgia State Lunatic Asylum.

DEAR SIR:—I have the honor, herein, to transmit, through you, to the Honorable Board of Trustees of the Asylum, my report for the year now ending.

I have conducted religious services in the Asylum Chapel, regularly twice a week during the year, viz: on Sunday afternoons and Wednesday evenings, except on a few occasions, when your sanction was given to my being absent. The Rev. Mr. McQueen, the pastor of the Presbyterian Church, and the Rev. Mr. Beck, the pastor of the Baptist Church, kindly filled my place on these occasions.

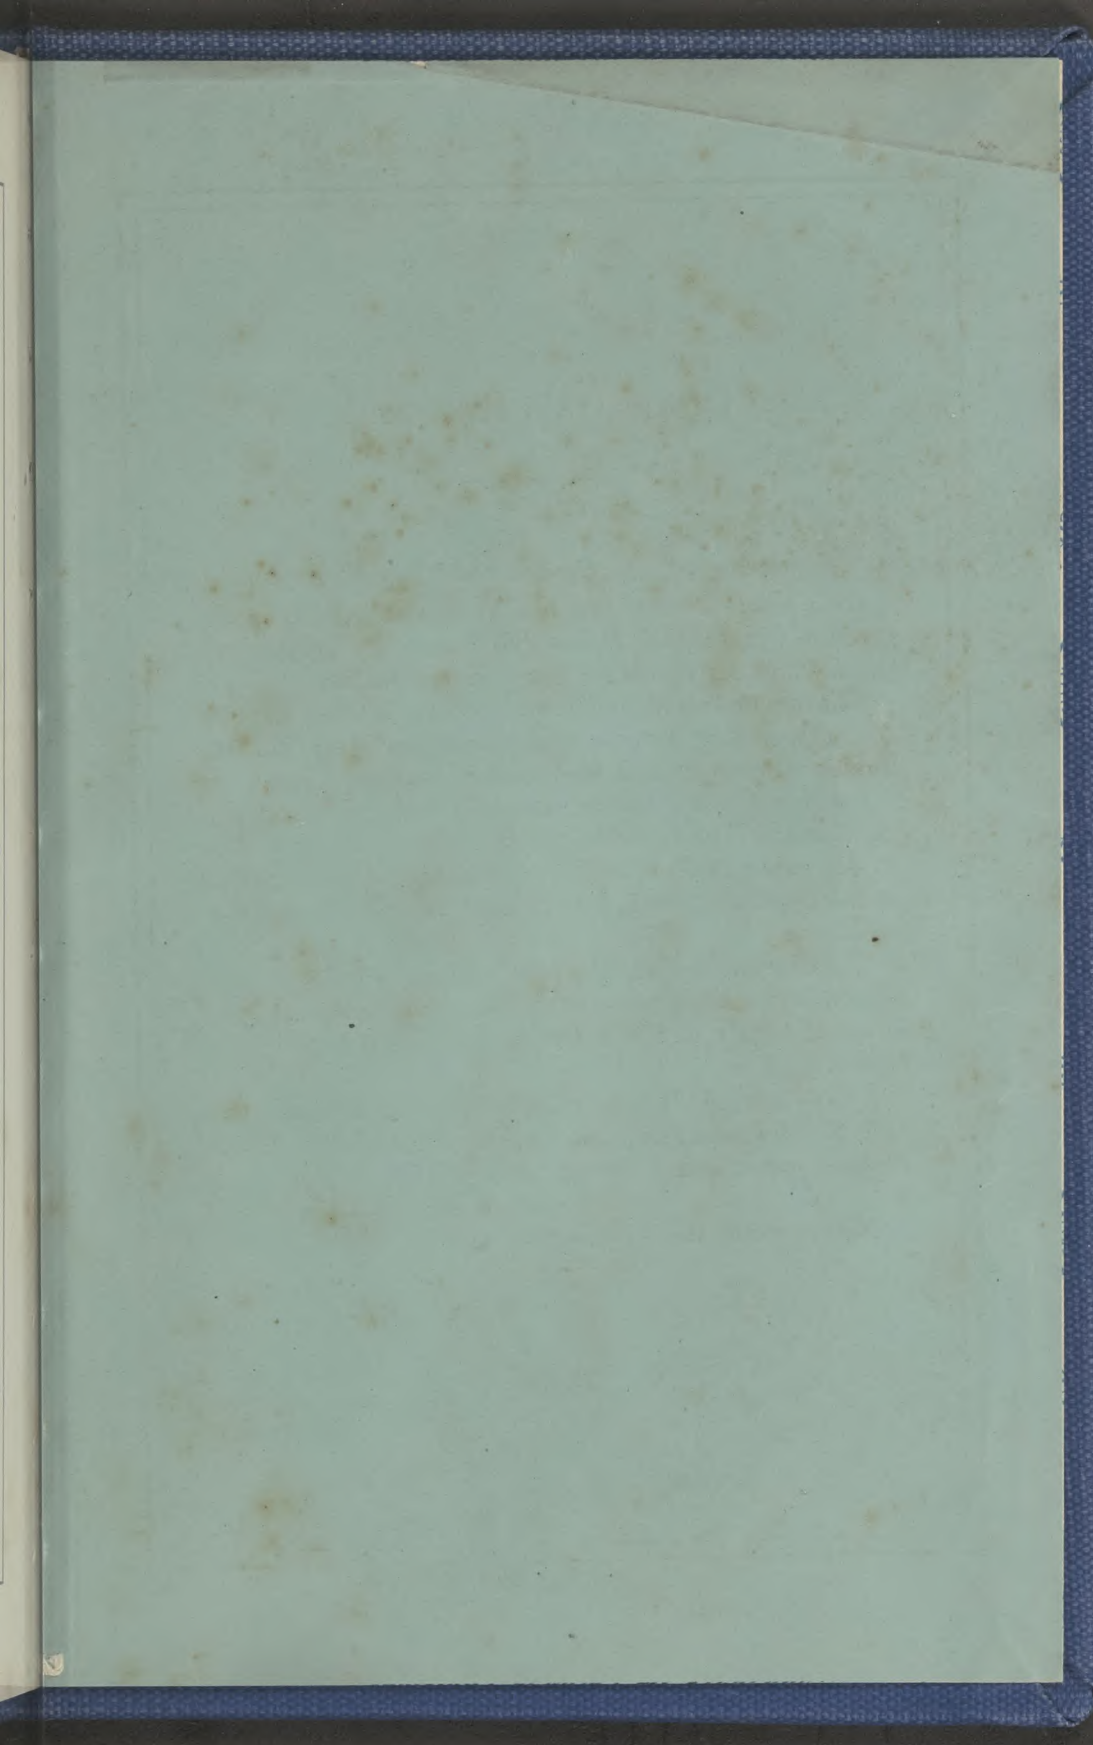

The heartiness and pleasure of these services have been due in a large measure to the music that has been supplied by Mr. and Mrs. Orme, and some others of the ladies.

I have obeyed all calls to bury the dead and visit the sick of the Institution, and have performed the duties deemed expedient.

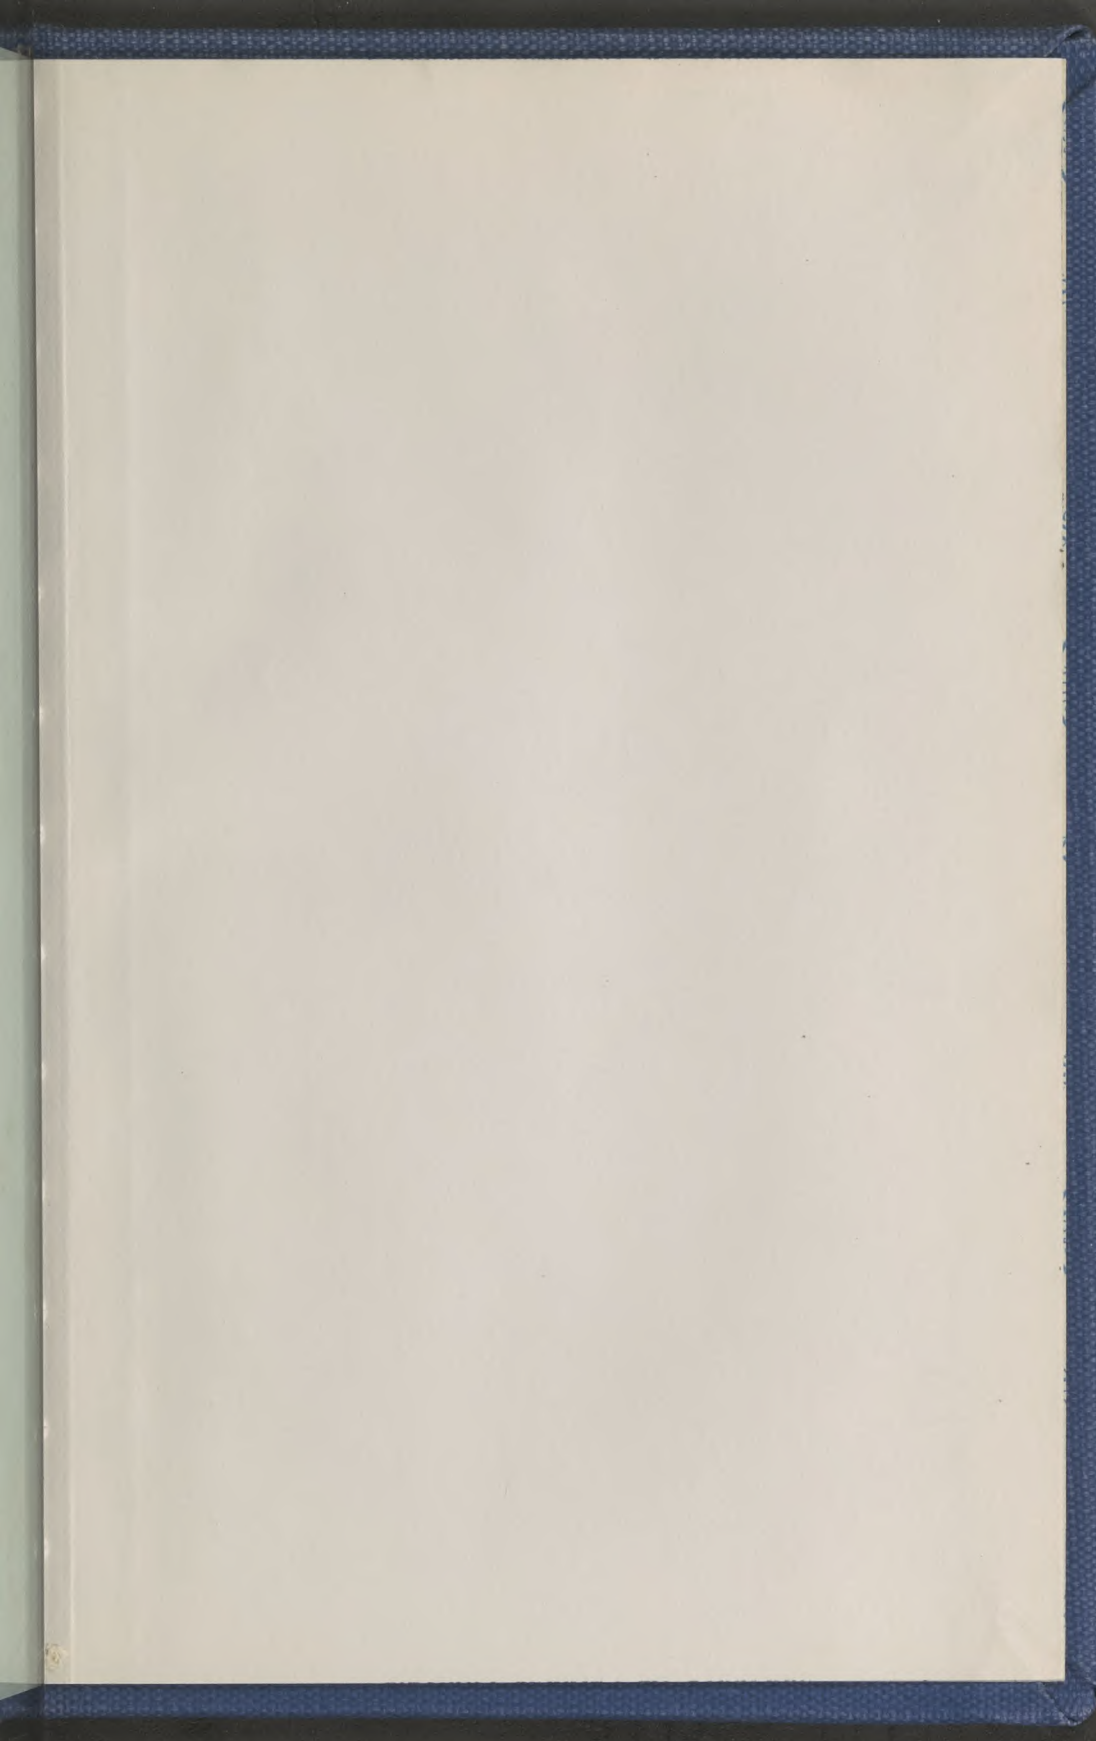

Yours respectfully,

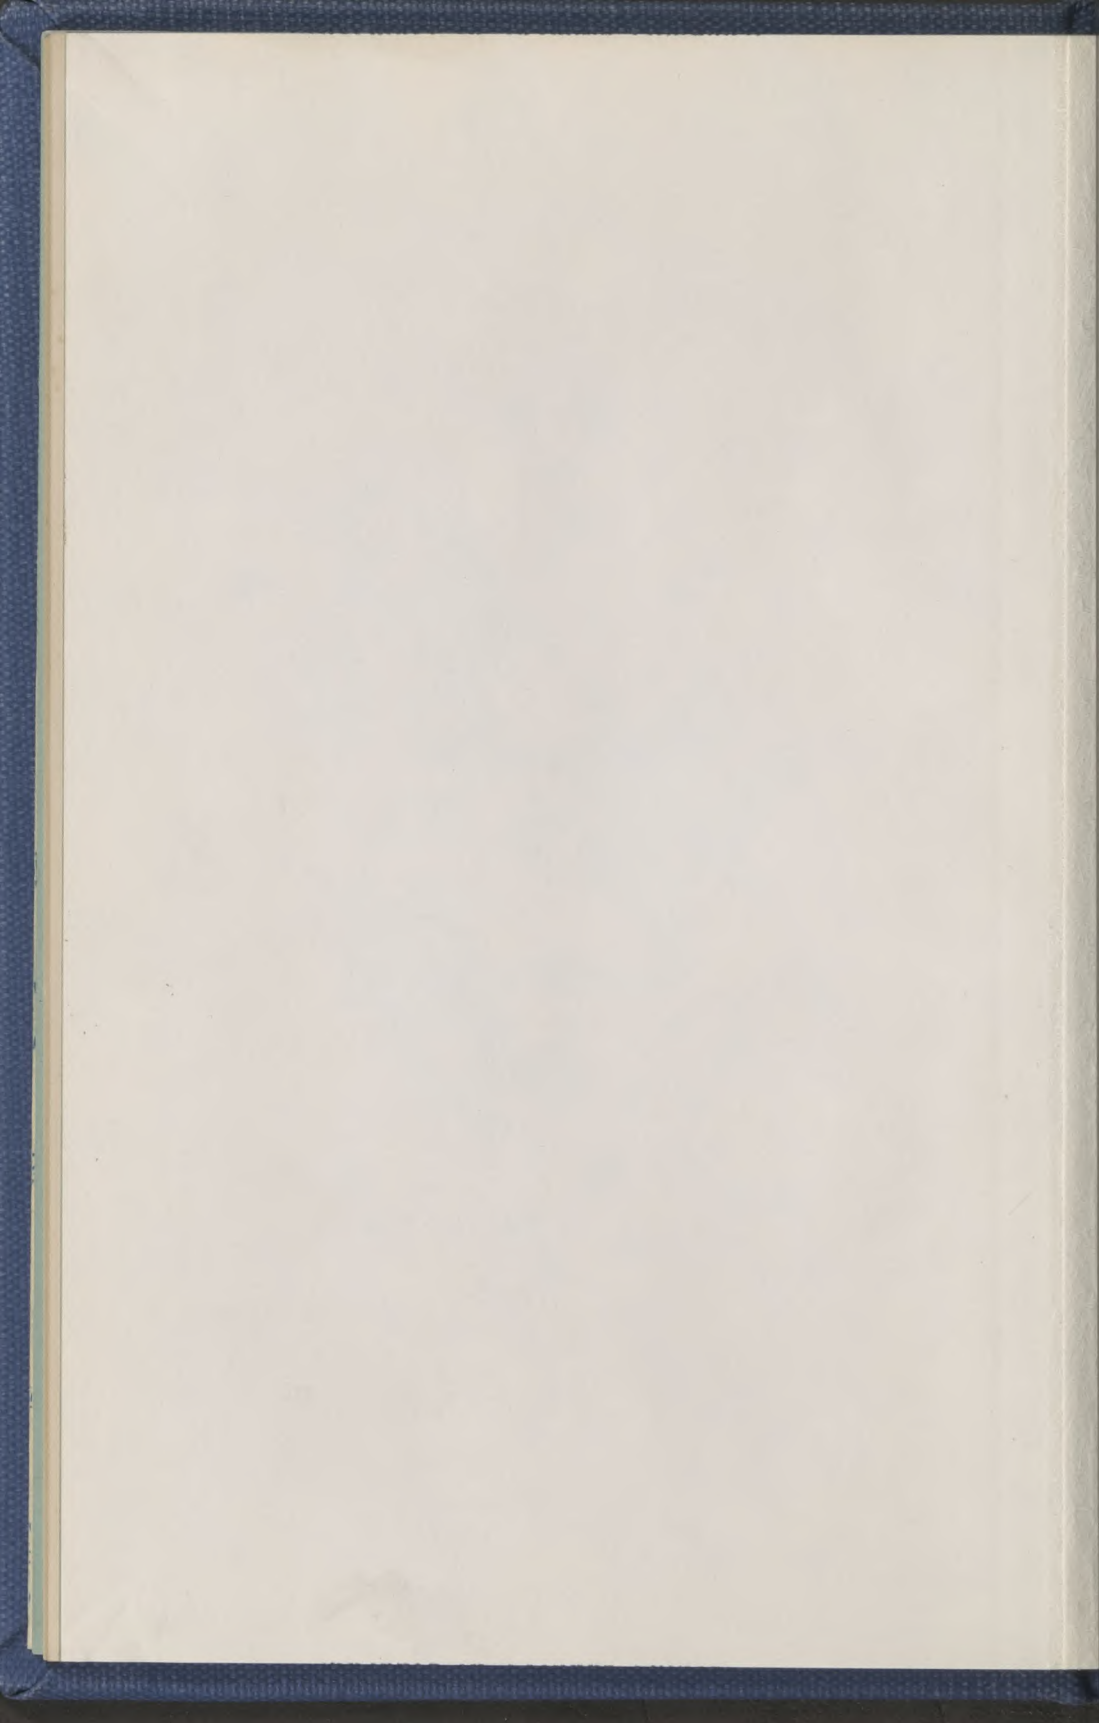

J. M. STONEY, Chaplain.

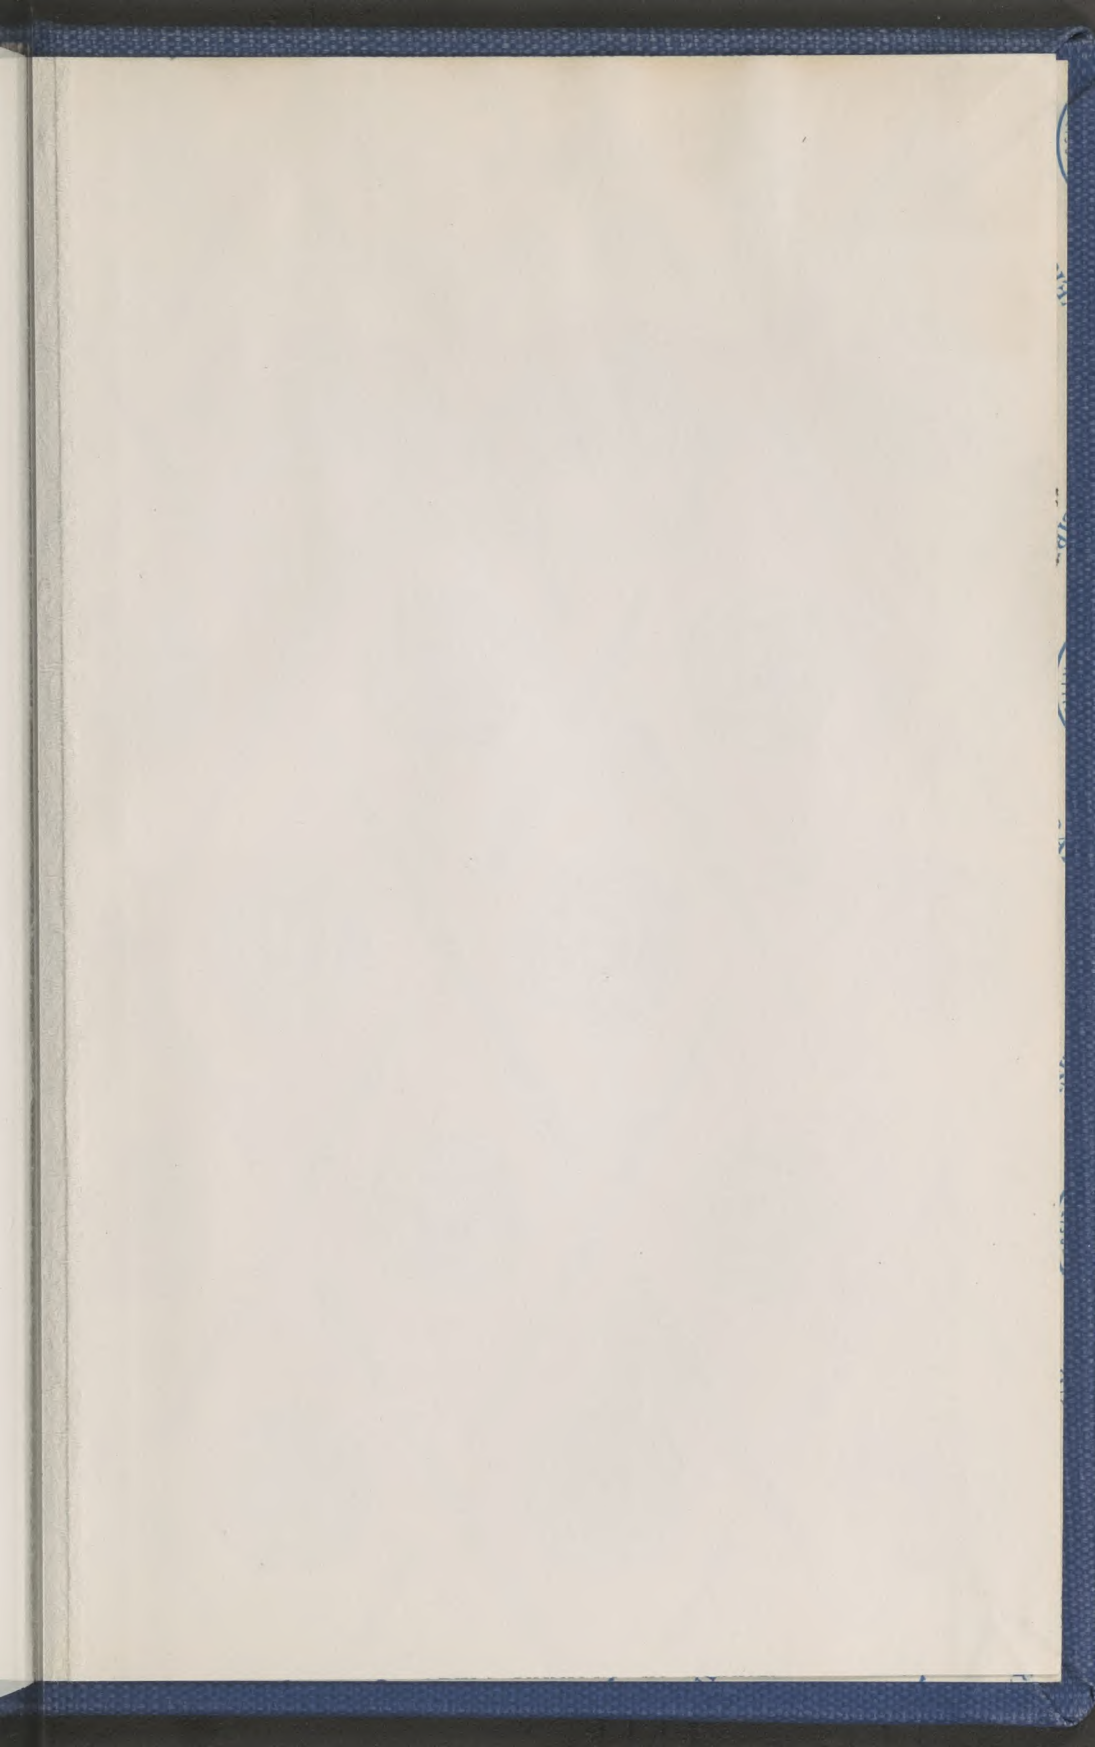

Milledgeville, Ga., October 1st, 1882.
